PROFESSIONAL SUMMARY

Final-year BSc Computer Science student at UCC specialising in AI and LLM engineering, with 6 months at Musgrave as AI & Automation Intern, a dissertation empirically benchmarking AI coding tools, and broader full-stack and ML experience in Python, TypeScript, and Next.js. Seeking opportunities for AI or software engineering roles in Ireland.

SKILLS

Languages: Python, TypeScript, Java, SQL, HTML/CSS **Frameworks & Libraries:** Next.js, React, Flask, Prisma, Jest, TensorFlow, PyTorch, NumPy **Tools & Platforms:** GCP, Git, Linux, Copilot Studio, SharePoint, MS Office

EDUCATION

BSc Computer Science (Honours) | University College Cork, Cork, Ireland | September 2022 – Present

Final Year Project (submitted April 2026) – AI Tools Retail Benchmark Empirical Study
(<https://github.com/Nischay11jr/fyp-1492-ai-retail-audit>)

- Built a reproducible benchmarking platform on GCP (4 isolated environments, systemd-managed) to evaluate Claude Code, Cursor, ChatGPT, and Firebase Studio across 17 standardised software-engineering tasks.
- Designed and implemented 338 automated tests (TypeScript / Jest) covering structural correctness and runtime behaviour for the Next.js / Prisma / SQLite retail application under test.
- Maintained audit integrity with SHA-256 hashed prompts and response manifests, logged intervention turns, and manual-fix counts to quantify tool autonomy.
- Findings: agentic CLI tools (Claude Code, Cursor) significantly outperformed chat-based and platform paradigms — 0 manual fixes vs. 27–40 for chat/platform tools.

Other Projects & Assignments:

- Redesigned Naked Wolfe, a luxury footwear website using Flask, Jinja2, HTML/CSS, enhancing its UI/UX and brand identity.
- Built a cocktail recommendation website with an LLM-powered chatbot for ingredient-based suggestions with the team.
- Created an image classifier neural network using TensorFlow and Google Colab Pro.
- Predicted a car's price using a Regression model using NumPy and PyTorch in Jupyter Notebook.

- Constructed an e-commerce platform using HTML/CSS, Flask, Jinja2 from scratch, focused on UI/UX and effective product presentation.

EXPERIENCE

AI & AUTOMATION INTERN

Musgrave | Tramore Road, Cork, Ireland | March 2025 – August 2025

- Curated and published an AI learning curriculum, streamlining 1000+ courses tailored into Beginner, Intermediate & Advanced tracks for efficient employee upskilling.
- Built an HR-Ops chatbot with Copilot Studio & SharePoint, automating HR policy queries and improving employee access to information in a Hackathon.
- Researched and prototyped an Additional Needs Toolkit, categorising AI accessibility tools and creating a prompt library to support employees with diverse needs.
- Led Musgrave's Intern Innovation Project, managing a cross-functional team of 3 interns to design a Musgrave Staff-Bot with multiple AI agents and presented to senior management.
- Tested & evaluated AI-enhanced platforms, including MS Excel, Power BI, and an HR-developed AI agent, designing structured test cases, created a suggested prompt library, and presented to employees with recommendations for improved functionality and data-driven insights.

FLOOR-STAFF MEMBER (PART-TIME)

Dwyers of Cork | Washington Street, Cork, Ireland | November 2023- March 2025

- Delivered exceptional customer service to ensure a welcoming and enjoyable customer experience.
- Helped with the orientation and training of new floor employees on their responsibilities.
- Managed client inquiries and resolved complaints to maintain customer satisfaction effectively.

EXTRA-CURRICULAR ACTIVITIES

- PRO (Public Relations Officer) for UCC Indian Society (2023-2025), managed sponsorships and publicised events on different social platforms.
- Collaborated with a team at Microsoft in Dublin for the "Sustainable Cities Challenge", presenting the idea of Vertical farming with robots instead of human labour for sustainable future cities.
- Created a blog (FabFitFinds) focused on affiliating new AI tools and products with the help of online tools such as 10webs, WordPress and its inbuilt tools for building and optimising the blog, Google Trends for market trends and research.
- Completed certified courses in Python (Programming for Everybody / Python Data Structures from University of Michigan), Java (Introduction to Java from LearnQuest), and AI (AI for Everyone by DeepLearning.AI) from Coursera to enhance technical skills.
- Participated in U-18 DYL (Delhi Youth League) football matches and ranked 4th position in the league.
- Certified by the Goethe Institute for completing the A1-level German.
